

# Set an Intention

---

The best way to make something happen in your life or business is to set an intention. Writing your intention down is powerful.

Think of the #1 reason you want to be part of this process to jumpstart your brand online. What is your overall intention? Keep your answer brief, with 1 to 2 sentences, or even just a few words. You don't have to share this with anyone, it's for you to be clear on your overall big idea and goal.

It's recommended you have a meaningful intent for this immersive process, rather than just making money or having a blog. How will you create impact?

**My Intention**
